Full Stack Development: Angular, Responsive Web Design, REST APIs, JSON, Frontend-Backend Integration

Databases: PostgreSQL, MySQL, Database Design, CRUD Operations

Tools & Practices: Git, GitHub, VS Code, Agile, Object-Oriented Programming, SDLC

Business & Marketing: Brand Strategy, Product Positioning, Client Communication, Social Media Marketing, Market Research

PROFESSIONAL EXPERIENCE

Co-Founder & Chief Marketing Officer | NoCap Systems | 2025 - Present

- Co-founded a technology startup focused on developing practical software, education technology, and workflow automation solutions.
- Lead brand positioning, product communication, social media strategy, client presentations, and marketing content for company projects.
- Collaborate with the development team to define product requirements, explain technical features, and align solutions with user needs.
- Support business development by preparing proposals, portfolio content, promotional material, and project demonstrations.

SELECTED PROJECTS

Teacher Assist - AI-Powered Academic Assistant | Angular, Python, PostgreSQL, AI

- Contributed to a full-stack platform for automated assessment generation, OBE workflows, CLO gap analysis, marksheet transformation, and academic assistance.
- Supported Angular frontend development and integration with Python-based REST APIs and PostgreSQL data structures.
- Helped present product features, user benefits, and project value for academic stakeholders and exhibitions.

Movie Recommendation System | Java, Object-Oriented Programming

- Developed a Java-based movie recommendation system using classes, objects, inheritance, encapsulation, and polymorphism.
- Organized movie, user preference, rating, and recommendation logic into reusable modules for easier maintenance and extension.

Weather Application | Programming Fundamentals

- Developed a weather application as a Programming Fundamentals project to display weather details based on user-entered locations.
- Applied core programming concepts including variables, conditions, loops, functions, input validation, and structured problem solving.
