

Course Name: Principles of Management

Exam Type: Quiz

Total Marks: 10

Time Allowed: 60 minutes

Section A - Multiple Choice Questions (MCQs)

Instructions: Each question carries 1 mark. Select the most appropriate option (A, B, C, or D).

Q1. Identify the management function that involves monitoring, comparing, and correcting work performance to ensure goals are met.

- A) Planning
- B) Organizing
- C) Controlling
- D) Leading

Q2. In the three-step control process, what is the immediate step a manager takes after measuring actual performance?

- A) Establishing standards
- B) Comparing actual performance against a standard
- C) Taking managerial action
- D) Revising the organizational goals

Q3. Define "Benchmarking" as described in the organizational control context.

- A) Setting the lowest possible cost for production
- B) Searching for the best practices that lead to superior performance by comparing with world-class firms
- C) Measuring the personal observation of a manager
- D) Creating a graphical dashboard for process monitoring

Q4. According to the SMART methodology for setting performance measurements, what does the acronym "S" represent?

- A) Standardized
- B) Statistical
- C) Specific
- D) Sustainable

Q5. A manager uses statistical reports and personal observation to determine what is happening in the department. Which step of the control process is being executed?

- A) Establishing standards
- B) Measuring actual performance
- C) Taking corrective action
- D) Feedforward control

Q6. Distinguish between monitoring techniques: Which type of monitoring provides a "post-mortem" view of a process by focusing on already completed cases?

- A) Online Process Monitoring
- B) Concurrent Process Monitoring
- C) Offline Process Monitoring
- D) Feedforward Process Monitoring

Q7. Which type of managerial action looks at *how* and *why* performance deviated before correcting the source of the deviation?

- A) Immediate corrective action
- B) Basic corrective action
- C) Status quo maintenance
- D) Standard revision

Q8. Classify the following control type: A manager implements a new rule to inspect raw materials before they enter the production line to prevent future defects.

- A) Feedback control
- B) Concurrent control
-) Feedforward control
- D) Reactive control

Q9. When employees perceive control attempts as unreasonable because the manager tries to control too many minute details, this leads to resistance known as:

- A) Inappropriate Focus
- B) Overcontrol
- C) Rewards for Inefficiency
- D) Too Much Accountability

Q10. Case Study:

A retail store manager notices that sales for the month are 15% lower than the established target. After investigating, the manager discovers the deviation was due to a temporary road closure near the store, not staff performance. The manager decides to keep the current sales targets for the next month without disciplining the staff.

Question: Which course of managerial action did the manager choose to implement?

- A) Change the standard

- B) Immediate corrective action
 - C) Maintain the status quo
 - D) Basic corrective action
-
